

SF18 Shortening Filter

Description

Belshaw's SF18 shortening filter effectively cleans and recycles shortening in any fryer with capacity up to 16.25 gallons (61.5 Liters).

Standard Features

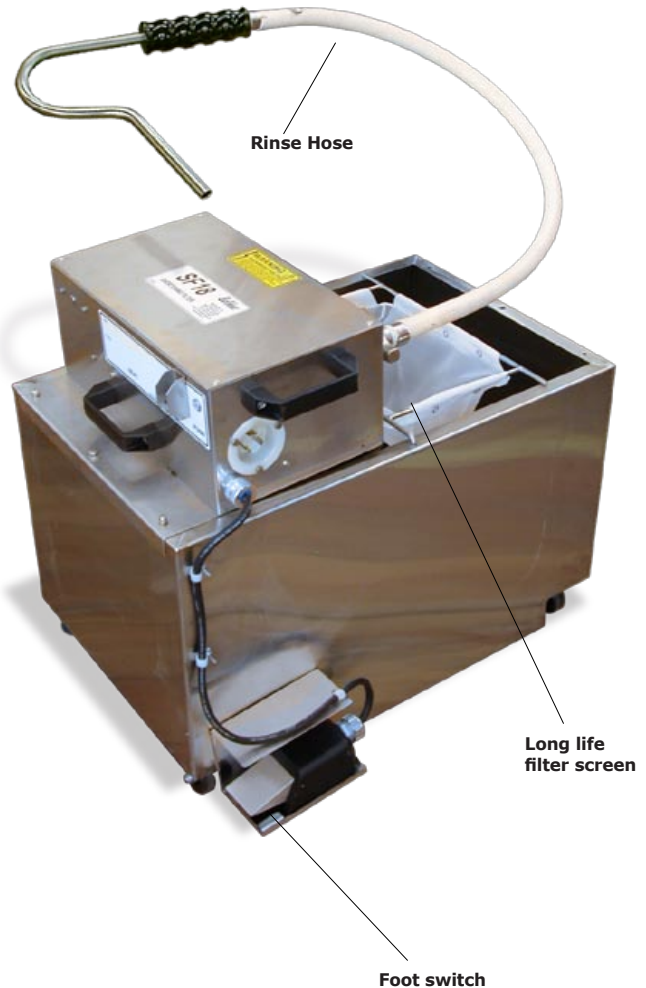

- Compatible with Belshaw's 618L, 718LFG, and 718LCG fryers. For other brand fryers, check capacity and dimensions to determine compatibility.
- Capacity 16.25 gallons (29.5 L), approximately equivalent to 130 lbs (59.5 liters) shortening
- Long-life synthetic filter screen that needs only annual replacement under normal operating conditions.
- Heavy duty pump & motor for pumping back shortening to the fryer after filtering
- Heavy duty, moisture repellent foot switch for activating pump
- Hand held rinse hose for rinsing debris from bottom of fryer and for refilling fryer with plated steel nozzle and heat resistant handle.
- Slides under compatible floor and tabletop fryers
- Heavy duty stainless steel frame, tank and casters
- Certified by ETL to NSF Std 4, CSA C22.2, and UL 1889

Options

- None

Not for use with Zero Trans Fat Shortening

- Belshaw's SF-18 Shortening Filter is not designed for Zero Trans Fat shortenings (these can sometimes cause blockages in the filter pump). Belshaw warranty does not cover any returns, repairs or replacements following the use of Zero Trans Fat Shortening.
- Belshaw recommends using the EZMelt 18 Melter-Filter for Zero Trans Fat shortenings. The EZMelt contains a heating element to liquify any shortening. The EZMelt also enables safe and easy refills of the fryer whenever needed.
