

Product Line	<b>YEAST-RAISED DONUT DEPOSITOR</b>
Model	Type F-YRD

New Product

## Type F-YRD Yeast-Raised Donut Depositor

Belshaw now offers a version of its Type F depositor for yeast-raised donuts. With the Type F-YRD, rolling and cutting dough are unnecessary. The depositor fills a 17" x 25" screen in under 30 seconds, and produces great tasting, well-rounded ring donuts.

- Any standard yeast-raised donut mix can be used.
- Donuts are deposited directly onto a fryer screen.
- Donuts are proofed like any other raised donut
- Donuts are fried normally.
- Type F-YRD employs a special plunger to deposit dough, usable for yeast-raised ring donuts only
- The adjustment dial at the side of the Type F-YRD allows a range of batter weights for each deposit.
- The Type F-YRD utilizes a motor and trigger handle to deposit at a rate of 57 per minute when the trigger is held down.
- The Type F-YRD is compatible with all open kettle fryers. It can also be used in conjunction with Donut Robot® systems
- Belshaw depositors, the industry standard for many years, are legendary for their precision and smoothness of operation - even after many years of use. Each depositor is engineered of durable gears, cams and trip arms to produce near-identical volume and shape with every deposit.
